

ENVIRONMENTAL POLICY

While meeting the needs and expectations of its consumers and customers, METGİN LTD. adopts an environmentally conscious approach within the framework of sustainability by continuously improving the environmental performance of all its activities. It takes as its basis the principle set out in the definition of sustainable development: **“To meet the needs and expectations of today without compromising the ability of future generations to meet their own needs and expectations.”**

Taking the necessary measures to minimise our negative impacts on the environment during all our activities, and increasing our positive impacts, is an integral part of our business.

Accordingly, the requirements of the Environmental Management System are implemented, the system is reviewed periodically, and we strive to continuously improve our environmental performance. To this end:

- METGİN is committed to complying with the Environmental Legislation in force and with the regulations applicable to our sector.
- Aware that many resources are **“non-renewable”**, METGİN aims to **“minimise resource use from the outset”** by taking the necessary measures for the efficient use of resources.
- When preparing projects related to products and processes, environmental impacts are taken into account and efforts are made to prevent pollution at source.
- In the event of any accident or emergency that may occur during our activities, measures to minimise environmental damage are planned and implemented.
- To achieve success in environmental matters, all our employees are made aware and receive training to develop individual responsibility.
- Measures are taken to reduce the waste generated during our activities, and efforts are made to put reuse and recovery opportunities into practice.
- As part of our social responsibility, our environmental activities are carried out effectively.
- All environmental work is addressed within the framework of **“continuous improvement”**.
- We work together with all our stakeholders to develop environmental awareness, increase knowledge and share best practices.
- To ensure that company employees are aware of the environmental policy and of their responsibilities, they will be provided with motivation for implementing these policies, together with the necessary training and resource support.
